PEER LEARNING
COLLABORATIVES - POPULATION HEALTH 2016

2016 PARTICIPANT HEALTH SYSTEMS
Adventist Health
Adventist Health System Hospital
Baylor Scott & White Health
Bon Secours Health System
Christiana Care Health System
Cone Health
Intermountain Healthcare
Memorial Hermann Health System
NewYork-Presbyterian Hospital
Northwell Health
Northwestern Memorial HealthCare
Novant Health
Ochsner Health System
Providence Health & Services
Regional One Health
SCL Health System
Spectrum Health
Stanford Health Care
St. Joseph Hoag Health
Yale-New Haven Health System
Vanderbilt University Medical Center
Virtua

CORPORATE PARTNERS
3M Health Information Systems
Amgen
Johnson & Johnson

2016 MEETING DATES
February 8-10, 2016
Phoenix, AZ
May 16-18, 2016
Chicago, IL
September 12-14, 2016
Phoenix, AZ

POPULATION HEALTH

COLLABORATING TO ACCELERATE INNOVATIONS
Innovation and time to market define success for today’s Top-100 healthcare organizations. To accelerate the use of best practices, The Academy Collaboratives have designed the first Top-100 health system-based shared learning process.

2016 POPULATION HEALTH COLLABORATIVE
The Population Health Collaborative will focus on emerging models in risk-based agreements and the infrastructures and processes used by health systems to effectively manage patient populations. The Collaborative will also explore the leadership structures, performance and outcomes measures, and compensation models used for employed and affiliated physicians. Through the use of exercises and facilitated discussions, health systems will address models for at-risk and value-based agreements, discuss the growth of government risk programs, and identify gaps in performance and capabilities. Participants will also discuss how they organize, monitor performance, and create value with new care models. The Collaborative is designed for executives and senior leaders responsible for population health initiatives.

2016 Collaborative Goals:
- Discuss the skillsets and capabilities needed to deliver enhanced value to patients while growing a risk-based business
- Explore the role of clinically integrated networks and other structures in identifying clinical processes and outcomes, engaging physicians, and growing value-based care capabilities
- Keep pace with the needs of the active healthcare consumer

The Challenge: To prepare for the value-based care environment and keep pace with regulatory pressures, health systems must accelerate understanding and preparedness to deliver population health. Health systems must reorganize and empower physician leadership and medical groups to create infrastructures that deliver population health by building value and improving clinical quality.

The Opportunity: To unite talent and insights to understand how health systems can position themselves to deliver population health and partner with health plans and CMS to create successful risk-based agreements.

2016 Collaborative Objectives:
- Develop an executive peer group of population health executives
- Compare your population health strategy with other organizations
- Learn directly from population health subject matter experts

THE COLLABORATIVE FRAMEWORK
Peer Teams: The Population Health Collaborative is designed for multi-disciplinary peer teams including financial, clinical, medical group, and operations leaders engaged in population health, led by an executive sponsor.

Exclusive Participation: A select group of 20-25 health systems and a limited number of companies will develop approaches more quickly by utilizing a collaborative model.

Faculty: Leading health system executives, subject matter experts, The Academy Executives-in-Residence, and The Academy Faculty Advisors.
Innovation and time to market define success for today’s Top-100 healthcare organizations. To accelerate the use of best practices, The Academy Collaboratives (The Collaboratives) designed the first Top-100 health system-based shared learning process. The Academy Collaboratives provide a fast-track way for health system peers to hone in on and respond to specific emerging issues. Multi-disciplinary teams enable Top-100 health systems to consider, respond, and implement changes in rapid succession.

About The Health Management Academy
The Academy provides unique, executive peer learning, complemented with rigorous and highly targeted research and advisory services to executives of Top-100 health systems. These services enable health system and industry members to cultivate the relationships, perspective, and knowledge not found anywhere else.

Collaboratives Advisory Committee
Our panel of Executive Advisors from Top-100 health systems provide insight and direction to our programs:

Mark Solazzo (Chair) – EVP and COO, North Shore- Long Island Jewish Health System
Bert Zimmerli (Co-Chair) – SVP and CFO, Intermountain Healthcare
Alfred Campanella – EVP, Strategic Business Growth and Analytics, Virtua Health
Karen B. Haller, Ph.D., R.N. – VP Nursing and Patient Care Services, The Johns Hopkins Hospital
Robert E. Kelly, M.D. – President, NewYork-Presbyterian Hospital
Bill Santulli – EVP and COO, Advocate Health Care
Jeffrey Weiss, M.D. – Medical Director, Montefiore Medical Center

Executives-in-Residence
The Academy Executives-in-Residence are recently retired senior-level health system or industry executives who contribute their experience and expertise to Academy programs:

Mark Dixon – Former Regional President, Fairview Health Services
Keith Marton, M.D. – Former SVP and CMO and Quality Officer, Providence Health & Services
Charles Watts, M.D. – Former SVP of Medical Affairs and CMO, Northwestern Memorial HealthCare

Consulting Faculty
The Academy Consulting Faculty include professors from exceptional graduate programs who provide the business school foundation to help Academy member executives create impact and drive change:

Pamela Peele, Ph.D. – University of Pittsburgh

“Participation in the Collaboratives was instrumental in shaping executive-level thinking about the changing healthcare market and the range of necessary responses.”

- PETER WEISS, M.D.
